Years rolled on; the husband toiled in the mines, and the wife remained at home waiting anxiously for his return. DICKENS AND THE CATHOLICS .- Mr. Dickens has had a controversy with an Ultramontane citizen of Cork, said to be an M. P. This gentleman, aggrieved by one or two articles exposing excesses in Italy, which appeared some time ago in All the Year Round, wrote to Mr. Dickens on the subject. Mr. Dickens, in reply, denied that the complaint was reasona-ble, declared that he never "pandered to any acrimonious or intolerant feeling" against the Montreal, built to replace the Cathedral of the Roman Catholic Church, and added the fol same name destroyed by fire nearly three years lowing well-merited thrust: "Let me, in all good humor, recommend you to observe whether its (the Church) accredited organs are as considerate toward Protestants, and to give your judgment of me the benefit of the com-

The case excited great interest in fashionable circles. facts briefly were these: Leonie was seduced in Orleans under promise of marriage. In order to secure this, she assented that she had given birth to a child. She was asked to produes it, and then conceived the plan, the ex-ccution of which was the cause of her appear-ance in Court. Having ingratiated herself with a simple-minded country nurse in the Tuileries Gardens, she stole the baby she had in charge while her back was turned, and with it deceived all her friends. The jury found her Not Guilty, and she was immediately set at liberty.

> Dr. Gouyon, of Paris, recommends a new and singular method of cure for the cholers, viz: making the patient swallow a certain quantity of grains of zinc, tin, iron, &c., of the size of a cherry-stone. Their ingestion into the in-testinal tube would then lead to the formation within the stomach of a voltate pile, which would generate an electric current calculated to stimulate the system, and restore vital senshillity to its previous tone. Dr. Gouyon goes further still, and would have his cholera pa-tients swallow whole chaplets of these grains.

AN OLD WOMAN STARVED TO DEATH BY HER Sons .- In Devenshire, England, a very old lady died recently under circumstances which led to the opinion that she was starved by her two sons, with whom she had resided. It was shown that the only food given to her was a little broad and water, which occasionally was sweetened with treacle. A verdict of manslaughter was returned against the young men, and they were committed for trial.

"We learn from a reliable source that General Scott, upon his recent arrival in the vi-cinity of British Columbia, dispatched a letter to the authorities of Vancouver's Island, announcing his arrival and indicating his read-iness to confer with the British authorities, with the view of a peaceful solution of the San Juan difficulty."

At the last accounts, Col. Lay, bearer of Scott's latter, had not returned; therefore nothing was known as to the spirit in which the General's communication was received. Should Gov. Douglass act in a spirit of fraukness and moderation, there is reason to believe that an arrangement will be made for the entire withdrawal of Harney's force, and a restoration of the same condition of affairs at San Juan as existed previous to the occu

pation.

It is not at all probable, however, that Scott will assent to make an apology for Harney's act, or arrange for the joint occupation of the Island. If he withdraws the troops at all, it will be done distinctly as a concession to British sensibility, with a clear understanding that such withdrawal is not to be considered as implying doubt to the American title to the disputed Territory, but that its sole object is to restore matters to such a position that England may with honor to herself, resume active negotiations for the settlement of the

boundary question by treaty.

THE SPLENDOR OF DAMASCUS.-Damascus is the oldest city in the world. Tyre and Sydon have crumbled on the shore; Baabee is a ruin; Palmyrs is buried in the sands of the desert; Ninevah and Babylon have disappeared from the Tigris and Euphrates; Damasous remains what it was before the days of Abraham—a center of trade and travel—an island of verdure in a desert-"a predestined capital," with martial and sacred associations extending through more than thirty centuries. It was "near Damasous" that Saul of Tarsus saw the "light from Heaven above the brightness of the sun;" the street which is called Strait, in which it was said "he prayeth," still runs through the city. The caravan comes and goes as it did a thousand years ago; there are still the shelk, the ass and the water-wheel; the merchant of the Euphrates and of the Mediterranean still "occupy" these "with the multitude of their waters." The city which Mahomet surveyed from a neighboring hight, and was straid to enter, because it is given to man to have but one Paradise, and for his part he was resolved not to have it in this world, is to this day, what Julian called "the eye of the East," as it was in the time of Isaiah, "the head of Syria." From Damascus came the damson, our blue plum, and the delicious apri-cot of Portugal, called damasco; damask, our beautiful fabric of cotton and silk, with vines and flowers raised upon a smooth bright ground; the damnak rose, introduced into England in time of Henry the VIII; the Damascus blade, so famous the world over for its keen edge and wonderful elasticity, the secret of whose manufacture was lost when Tamerlane carried off the arts into Persia; and that beautiful art of inlaying wood and steel with silver and gold, a kind of Mosaic-engraving and sculpture united-called Damaskeening, with which boxes and bureaus, and swords, and guns are ornamented. It is still a city of flowers and bright waters; the streams from Lebanon, the "rivers of Damasous." the "rivers of gold." still murmur and sparkle in the wilderness of

Things have at last come to such a pass that

it is not even considered necessary for an in-troduction to herald invitations to balls, con-

certs, or even dinners. The stranger sends his eard, and the invitation to the person he wishes to see in his house; the latter accepts

or rejects it as it suits with his humor. There

are noble families who maintain thomselves and marry off their daughters, by patronising wealthy foreigners; that is, they bring their visiting, ball, and dinner lists by their influ-

ence to the foreigner's house, and at the

foreigner's table and ball, liquidate, as it were, by attorney, their own social debts. It is even whispered these noble families do not

always disdain levying a commission on the purchases made from tradesmen by the wealthy

he alluded to the recent events in the life of John Brown. The determination of giving

INTERESTING CONSECRATION - CELEBRATED STAFF AND CROOK.-The staff which was used by his Lordship, Bishop De Charbonnel, at the consecration of the Condjutor Bishop of Toronto, was composed of an old staff of the late lamented Bishop McDonnell, and the crook was that used by the Abbot of St. Fillan to bless the Scottish army at the battle of Ban-nockburn. It is of solid silver with some relic lar fact that England, which has the advantage over most other countries, in the degree of political liberty enjoyed by her inhabitants, should be so far behindhand as she is in the matter of general education. While a liberal provision had long ago been made in her Universities and Colleges for instructing the nobility and gentry of the kingdom in the ancient classics, and in such branches of knowledge as it was thought most desirable that they should become acquainted with, it is only quite lately that institutions have been established for teaching to the working classes of the community anything beyond the veriest enclosed upon a white stone, and the workmanship conclusively proves its antiquity. It is probable that such an interesting staff was never held on a similar occasion by any consecrator outside of the city of Rome. It was while kneeling before the Abbot, holding this blessed staff in his hand, that the English monarch remarked that the Scots were suing for mercy. He found his mistake, however.

SCHANYL'S ARRIVAL AT HIS RESIDENCE. The Journal de St. Petersbourg announces the arrival of Schamyl at Kalouga, the town selected for his residence. He was attended his son and three murides, and alighted at the principal hotel of the place. The next day he paid a visit to the Governor, and afterward went to see the house intended for him. He was particularly struck by the black marble busts of two Greek philosophers in one of the rooms, and after many questions respecting the persons they represented, he requested to have them removed, as his wives would be frightened at the dark faces. He expressed himself perfectly satisfied with the house and locality in which it was situated.

AN ULTRA ANTI-SLAVERY PAPER .-- A new as ULTRA ANTI-SLAVERY PAPER.—A new paper, entitled Brown's Orime, has been started at Painesville, Ohio, by Jno. R. French, formerly of the Painesville Telegraph. He accounts for the title by saying: "This is the designation which a large proportion of the press apply to the conflict at Harper's Ferry." We protest against such abuse of language. Is it not enough that the brave veteran who dared to strike for liberty is struck down by the hirelings of slavery, and now lies wounded and helpless in the prison of malignant and cruel foes, doomed to a speedy death?

A TERRIBLE ACCIDENT FROM HOOPS .- The fashion of hoops has been the means of a terri-ble accident at Salem, Oregon. Miss Ellen Umphlet was riding on horseback, when, losing her balance, she fell backward, and her caught upon the horn of the saddle. The horse became frightened and ran with her along a fence for several hundred yards, when the point of a rail caught in her mouth, tearing the whole side of her face out and breaking her jaw in two places—the concussion stripping the clothes entirely from her, and thus freeing

her from the horse. ANECDOTE OF COLERIDGE.-Coloridge was remarkably awkward horseman, so much so as generally to attract attention. He was one day riding on the turnpike read in the country of Durham, when a wag approaching him, noticed his peculiarity, and mistaking his man, thought the rider a fine subject for a little sport, and as he drew near he thus accoated Mr. Coleridge: "I say, young man,
did you meet a tailor on the road?" "Yes,"
replied Coleridge, who was never at a loss for
a rejoinder, "I did, and he told me if I went little further I should meet a goose !"

A WOMAN ATTEMPTS SCICIDE AND SWALLOWS Has Walron.—Harrist Leader, a woman of intemperate habits, on being taken to a station-house, in Boston, attempted to commit suicide by severing the arteries of her arm with a lancet. To prevent the doctor from taking away the instrument she swallowed it. Although she persisted in tearing the bandages from her wounds, more danger was appre-bended from the internal than from the external operation of the lanest.
